

# LINKVOTE+ MOBILE VOTING

# THE LINKVOTE+ MOBILE APP

LinkVote+ is Link Market Services' mobile voting app which replaces paper voting cards at physical meetings.

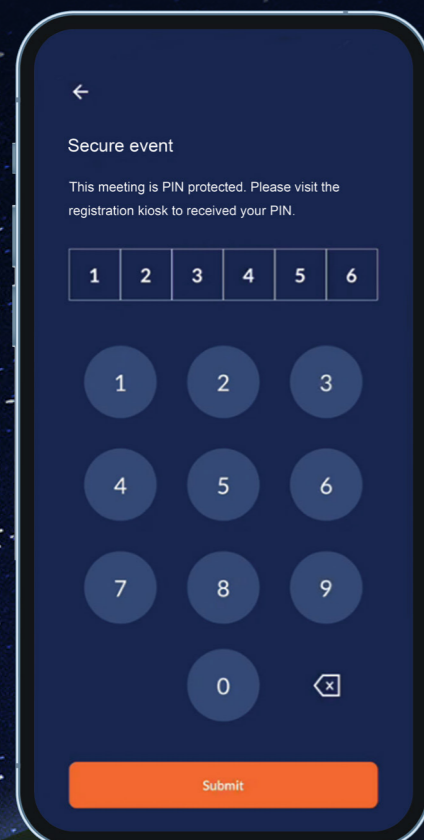

Other features of the app will include the ability for physical attendees to submit questions directly to a moderator, just like an online participant can when attending a hybrid or virtual meeting.

1

Prior to the meeting, download LinkVote+ from [Google Play](#) or the [Apple App Store](#).

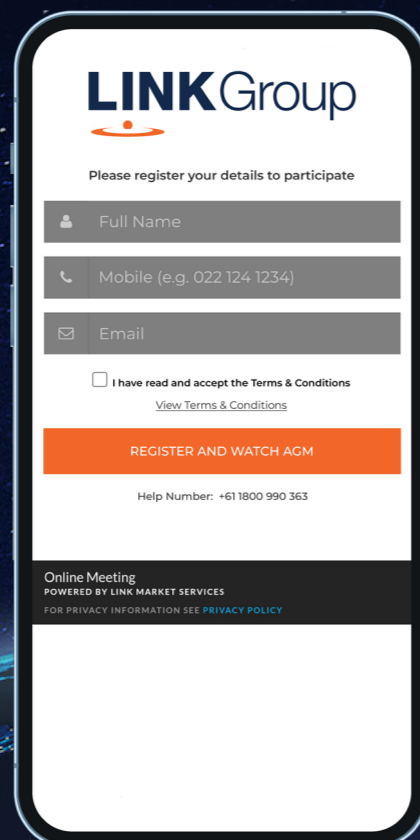

2

When you arrive at the meeting, locate the registration desk to obtain your six digit pin code and enter it in to the app. This will register the voting holder.

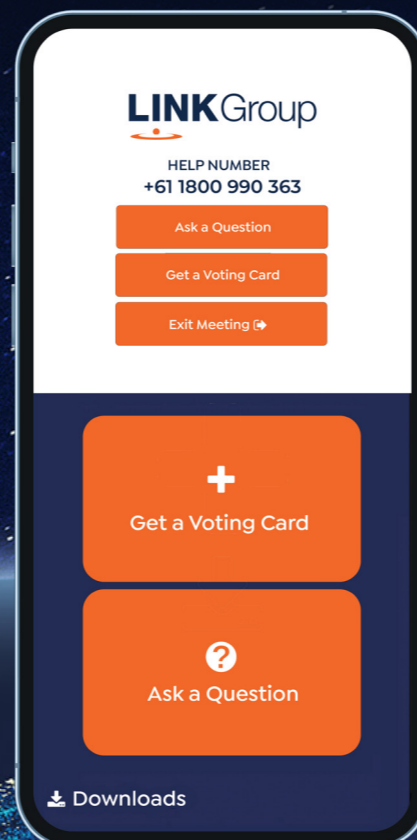

3

You will then be able to enter the meeting and register your full attendance details by validating yourself as a shareholder.

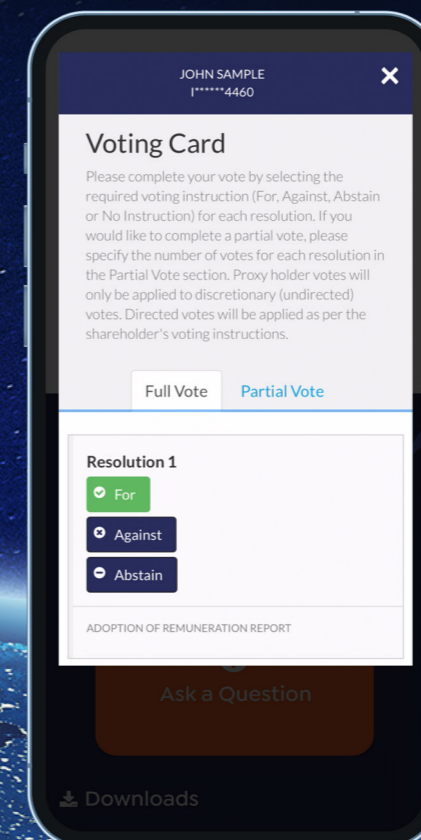

4

If you have additional holdings, choose "Get Another Voting Card" and provide your HIN or SRN to access the additional holding.

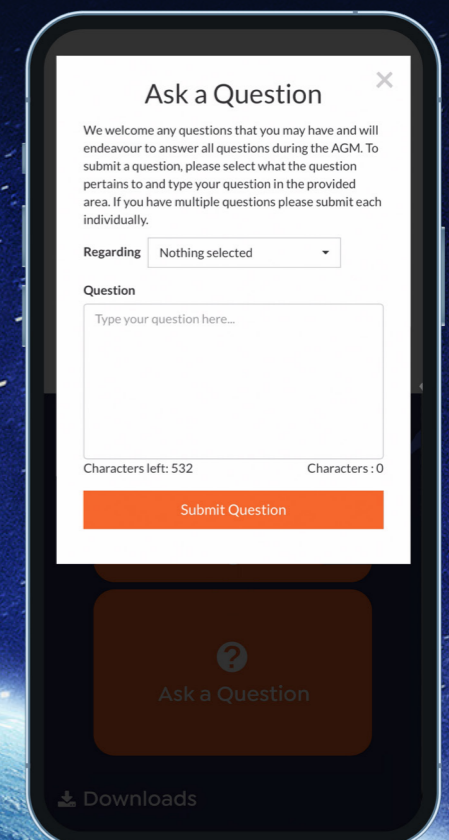

5

Once registered, you can vote. You can vote anytime during the meeting by completing the voting card and casting your vote.

6

You can submit live questions during the AGM towards the Chair or Board by clicking "Ask A Question".
