Important Notes

The Nominated Estimated Pool Return (NEPR) is set at the start of the season, using market rates at that time, in order to establish a rate to pay growers during harvest. The 22/23 NEPRs were based on market rates prevailing on 23rd September 2022.

NEPRs should not be used as an indication of final pool return.

Current EPRs will be updated throughout the harvest.

Finance costs are the interest and financing costs associated with CBH Group's funding facility, used to pay growers before payment for sales made in the pool have been received.

New pool grades may be introduced throughout the harvest period where appropriate

Special Conditions

Non ISCC Canola delivered to the pool will be subject to a \$25 per tonne discount.

Snail grades CNS1 and CGS1 are applicable to Kwinana, Albany, and Esperance port zones.

For CNS1 in Esperance, premium may apply - current estimate is at \$30 premium compared to other port zones.

Quality Payments

Oil premiums start at 42% and are uncapped. A 1.5% premium or discount applies to the price for every 1% oil content above or below 42%, based on the clean seed value.

Other Estimated Costs (per tonne)

Underwriting (Optional for Advance or Loan pay-type) **\$1.90**

Levies (Estimate of statutory levies and end-point royalties) **\$4.00**

How to use this Fact Sheet

The Harvest Fact Sheet provides a snapshot of the essential information required to understand what value the pool will provide for your grain. It provides you with EPR changes throughout harvest, current interest rate, what rate we use for pool payments during the harvest period (NEPR) and an estimation of costs to deduct from pool payments.

Refer to the CBH Pool Calculator for full range of payment details and timings.

How to Participate: This season the 2022/23 Harvest Pool is changing from an open access product to an allocated access product based on previous grower patronage of CBH Pools. Contact Grower Service Centre for more information.

CBH Pool Calculator

The online Pool Calculator provides an estimate of timing and percentage of pool payments over the life of the pool.
